

# Landscapes WA

Striving for complete client satisfaction in every project, Landscapes WA leaves no stone unturned to ensure the very best results.

Each client of Landscapes WA enjoys the exclusive type of personalised service that only comes from a family-run business.

The company has evolved since its establishment in 2005 to become an industry leader in the construction of high-end landscaping projects throughout Perth and the South West.

Providing the complete package, Landscapes WA has an in-house landscape architect design service and follows through with high-quality project management.

Landscapes WA has been proudly involved in the landscaping of the Housing Industry Association and Master Builders Australia Homes of the Year more than eight times.

### SOUTH YUNDERUP

Landscapes WA designed a modern, contemporary garden that complemented the interior of this home.

Considering the block that the house was situated on was very tight, there was a challenge in incorporating a second living area in addition to the built-in alfresco.

Working alongside Dale Alcock Homes in the construction of the landscape, Landscapes WA managed to maintain a very modern feel for the home while incorporating natural features through the use of a limestone rubble wall, decking and washed aggregate paving.

An outdoor heater creates the 'wow' factor and ensures the alfresco can be used all year round.

Adding plenty of vibrant colour to the garden, grass trees (*Xanthorrhoea preissii*) and bands of kangaroo paws offer a distinct native Australian planting and also complement the modern structure and materials used in the hard landscaping.
